

Case History: Damage Control

Well Testing

High Pressure Test Separator	35-50 MMCF
I P Test Separator	35-50 MMCF
HP Test Unit	35-50 MMCF
Fuel Gas Scrubber	Platform operations
Water Skimmer	Platform operations
Vent Gas scrubber	Platform operations
Flare Boom Dual 6"	35-50 MMCF
Tri-Plex Pump	Platform operations
Two Atmospheric Storage Tanks	100 bbls each
Wet Oil Surge Storage Tank	Various sizes
Complete Piping Provided	Various sizes

Storm Damage: CETCO's Unique Solution Team Handles Major Storm Damage to Production Platform

A major operating company in the Gulf of Mexico had some unique challenges when their existing systems were damaged during a major hurricane in the Gulf of Mexico. They selected CETCO Oilfield Services to provide them with temporary services, personnel for 24 hour coverage, and a complete equipment rental package to handle all the production for the platform while repairs were being conducted.

The client and CETCO Oilfield Services participated in several pre-job meetings to discuss the customer's needs, requirements, and expectations for the long-term project. CETCO Oilfield Services handled the temporary production streams from oilfield operations on the platform for over 8 months to include oil and gas separation, produced water filtering, and proper discharge. All MMS, EPA, NPDES and customer requirements were met during the duration of the project.

Filtration

120 BBL Sparging Separation Tank	4 bbls per minute produced water treatment rate
RFV 2000 Skid	2 bbls per minute produced water filtering rate
CETCO's CrudeSorb® Filtering Media	Canisters giving our customers unlimited capacity
OS-72 Filtering Media Vessel	Bulk media filtering unit capable of being changed out within minutes
BW-2 Filtering Media Vessel	Bulk media filtering unit
All water samples gathered and tested	Full compliance with MMS and customer requirements
