

# PIPELINE SERVICES

**CETCO**  
**OILFIELD**  
**SERVICES**

Remember when service was the value  
and not the value added.

## Pipeline Applications

- Commissioning, Decommissioning, and Abandonment
- Pipeline Hydraulic and Pneumatic Pressure Testing
- Water Treatment for Discharge
- On-Line or Off-Line Pipeline Chemical or Mechanical Cleaning
- Terminals and Tank Farm Cleanup
- Stand Alone Separation and Filtration for Liquid and Gas

CETCO Oilfield Services Pipeline Division provides many solutions to the pipeline industry for both onshore and offshore applications. Using patented technologies, specialized mobile equipment, and our highly trained personnel, we provide unique and cost-effective service solutions to our clients.

# SERVICE & VALUE

The types of services we offer vary significantly between liquid hydrocarbon products and gas pipelines. Regardless of the type of job, CETCO Oilfield Services can design a pipeline services package to meet all your needs.

### CETCO Pipeline Services

	INTEGRITY TESTING		GENERAL SERVICES	
	Hydro Effluent Treatment	Smart Pigging	Commissioning Decommissioning	Cleaning
Project Management	•	•	•	•
Chemical Cleaning	•	•	•	•
Filtration & Separation Services	•	•	•	•
Dry Pigging Filtration		•	•	•
Water Treatment	•	•	•	•
Nitrogen Services		•	•	•
Chemical Pumps	•	•	•	•
Compressors	•	•	•	•
Flare Stacks	•	•	•	•
Tankage		•	•	•
Gas & Liquid Filter Separators		•		•

We pride ourselves in studying our client's needs and designing a unique and cohesive family of services to meet all requirements in a safe and cost-effective manner.

# COMPLETE PIPELINE SOLUTIONS

# SERVICE & SUPPORT

## Equipment & Support

### Pipe

Pipe may seem inconsequential, but it is always necessary. CETCO Oilfield Services has the ability to plumb all lines required to assure total control and proper disposition of every single cubic foot of gas, gallon of liquid, or ounce of solids. All piping is provided with all the required certification.

### Flare Stacks

We have a variety of flare stacks that are all easily mobilized. We can provide primary gas incineration or augment flaring capabilities onsite.

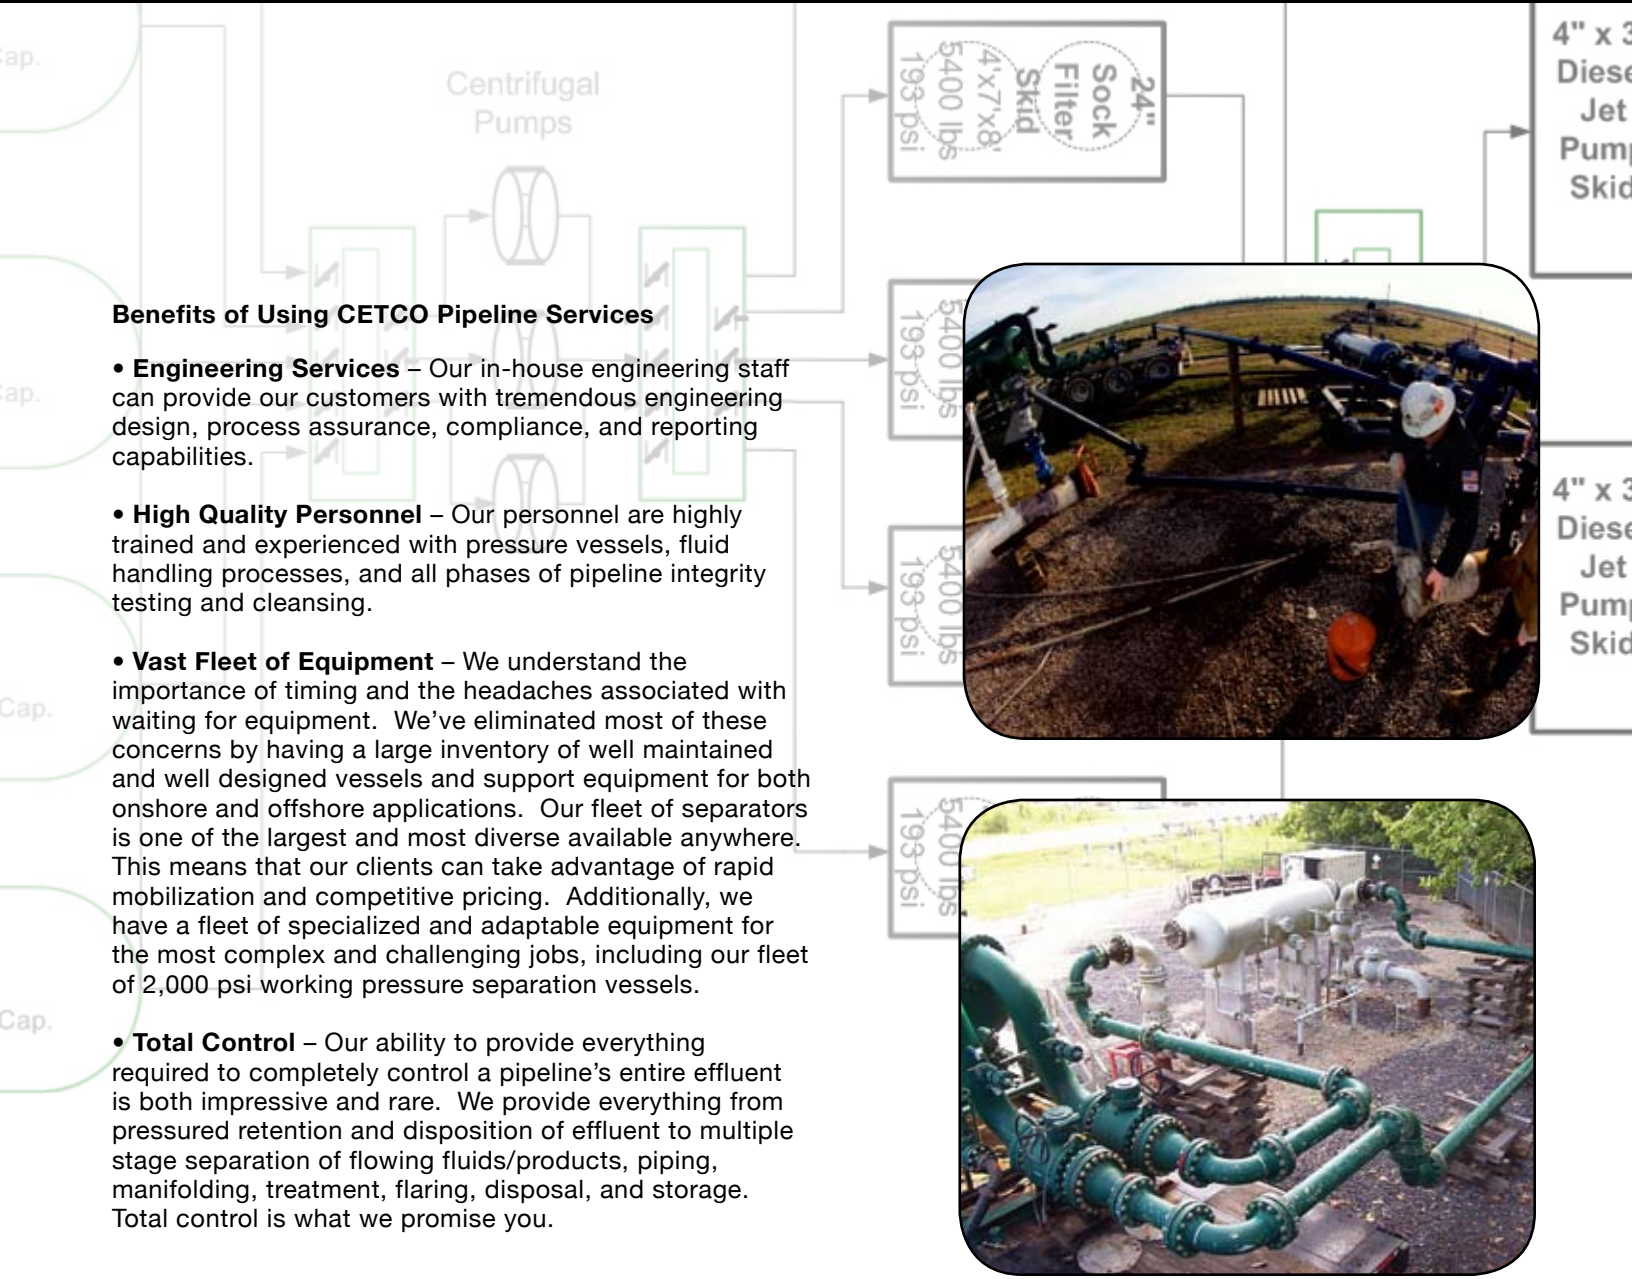

### Tanks

We can provide vessels from 100 to 210 bbl capacity. Smaller and larger units are also available, as are specialized units for transporting cargo of a particular concern.

### Pressurized Tanks

CETCO Oilfield Services can provide pressurized tanks for that added degree of security or final separation step. We follow a zero tolerance policy regarding gas emissions which is a benefit on virtually every project. This is one of the many advantages you can count on when you allow us to handle your project needs.

# BENEFITS

## Benefits of Using CETCO Pipeline Services

- Engineering Services** – Our in-house engineering staff can provide our customers with tremendous engineering design, process assurance, compliance, and reporting capabilities.
- High Quality Personnel** – Our personnel are highly trained and experienced with pressure vessels, fluid handling processes, and all phases of pipeline integrity testing and cleansing.
- Vast Fleet of Equipment** – We understand the importance of timing and the headaches associated with waiting for equipment. We've eliminated most of these concerns by having a large inventory of well maintained and well designed vessels and support equipment for both onshore and offshore applications. Our fleet of separators is one of the largest and most diverse available anywhere. This means that our clients can take advantage of rapid mobilization and competitive pricing. Additionally, we have a fleet of specialized and adaptable equipment for the most complex and challenging jobs, including our fleet of 2,000 psi working pressure separation vessels.
- Total Control** – Our ability to provide everything required to completely control a pipeline's entire effluent is both impressive and rare. We provide everything from pressured retention and disposition of effluent to multiple stage separation of flowing fluids/products, piping, manifolding, treatment, flaring, disposal, and storage. Total control is what we promise you.
