

UNIQUE SOLUTIONS
FOR ALL PHASES OF OILFIELD PRODUCTION

CETCO
OILFIELD
SERVICES

Production — Onshore

CETCO Oilfield Services has a full line of separation equipment to remove completion fluids to prevent well damage and avoid production equipment problems for existing wells. We have a wide range of vessel sizes and pressure ratings to meet most job types.

Production — Offshore

Offshore CETCO Oilfield Services aids in making your platform become more profitable through separation and water treatment services. Specializing in the removal of hydrocarbons, CETCO helps:

- Ensure production efficiency
- Reduce maintenance of facilities
- Guarantee overboard compliance

Initial well flowbacks, well testing, well work-overs, and produced water are just a few project areas. CETCO's system can work as a stand alone unit or as a system of vessels in series or parallel.

Drilling — Offshore

CETCO Oilfield Services handles product separation and water process needs from well head to discharge. Our specially designed portable testing equipment delivers accurate results to ensure proper well flow and provide initial test data to define well plans and facilities. CETCO can test, unload and/or clean new wells.

CETCO Oilfield Services processes water based fluids for compliant overboard discharge for the following:

- Elimination of problems associated with the managing of waste storage containers
- Increasing the efficiency of rig time
- Helping maintain a safer oil-free rig environment

CETCO Oilfield Services Company has a solid reputation within the oil and gas industry for its dependable service and continuing technological innovation. A subsidiary of AMCOL International Corporation, CETCO Oilfield Services provides an array of patent technologies, products and services for all phases of oilfield production. Having reached global dimensions, our unique services and solutions can be found in the areas of exploration, development, production, pipeline transportation, storage and refining. CETCO Oilfield Services works with its customers providing uniquely tailored services to meet individual needs.

Drilling — Onshore

CETCO Oilfield Services offers specially designed por-table test equipment to test, unload and/or clean new wells.

Refining and Chemical Plants

CETCO Oilfield Services provides high pressure services for gas, oil, water and solid phase separations for a variety of products for temporary applications, maintenance and turnarounds. CETCO can also treat miscellaneous water for discharge that would not be desirable in the plant mainstream processes.

Pipeline

At CETCO Oilfield Services, we customize every treatment based on customer and discharge requirements. By providing a multitude of options, CETCO allows its clients to clean or test the integrity of their transmission lines. By treating undesirable solids and fluid that occur during blow down or pigging operations CETCO helps maintain asset profitability. Pipeline servicing has unique complexities and we have a fleet of specialized and adaptable equipment to provide solutions to unusual or unplanned circumstances.

Pipeline and Terminals

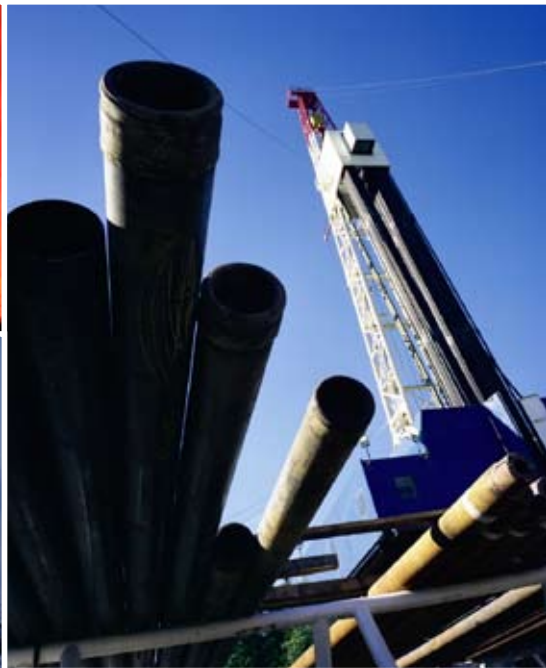

CETCO Oilfield Services provides multiple services such as:

- Treating hydrostatic water
- Filtering gas and liquids
- Treating blow down

Whether on land or on water, CETCO mobile services can treat a wide range of rates and volumes from various sources.

Coiled Tubing

CETCO Coiled Tubing services offers best in class service and engineering support to our customers. Whether you are working onshore or on the water, deep water or shelf, CETCO Coiled Tubing Services adds value to your well servicing needs. We can deploy 1.0" thru 2.0" coiled tubing with units rated to 15,000 psi working with depths to 23,000'. CETCO coiled tubing services provides a wide array of services.
