Well Testing Applications

- On-Site Data Reports
- Temporary Production Facilities
- Well Intervention / Well Cleanup and Flow Backs
- FRAC Flow Backs
- Surface Sampling
- Fluid Transfer to Filtration System, Barge or Specialized Vessel
- Maintain Produced Fluids
- HP/HT Capabilities
- Blowouts/Well Control

CETCO Oilfield Services Well Testing Division has been a leader in providing safe, dependable well testing and blowout flow control services to the oil and gas industry since 1968. We can design a well test package to meet all your requirements, even in well conditions with high pressure high flow rates and solids. Our commitment to safety and technological innovation leads to our high level of customer satisfaction.

This dedication to safety and technological innovation is evident in our highly trained personnel and our efforts in research and development. CETCO Oilfield Services prides itself as a leader in the worldwide oil and gas industry who is always at the forefront of new technologies. From process engineering to help you design the appropriate job, to providing the equipment and personnel necessary to perform the job, we are a complete solutions provider for all your onshore and offshore well testing needs.

WELL TESTING

RAPID MOBILIZATION

Safety & Training

At CETCO Oilfield Services, we put safety first. Safety protects our people, our client's assets, and the environment. Our employees undergo an extensive safety training program that includes T-2 production safety and regulatory training in both classroom and hands-on settings. Upon completion of our vigorous safety program, our employees achieve a certificate of competence in the particular grade (specialist or operator) and are equipped with the knowledge, skills, and abilities to perform every component of the job successfully.

Areas of Training

- T-2 production safety
- Hydrogen Sulfide safety
- Fire fighting
- Well control
- Basic core compliance training (Safe Gulf)
- Rigger certifications in accordance with API RP 2D fifth addition
- Certificate of competence in the particular grade (specialist 1-5 or operator 1-5)

Customer Satisfaction

CETCO Oilfield Services prides itself in its commitment to customer satisfaction. It is a key performance indicator within CETCO business and is part of our performance management. CETCO provides our customers with feedback forms at the wellsite to ensure we are meeting or exceeding our customer's expectations.

Equipment & Maintenance

CETCO Oilfield Services is proud to offer a vast inventory of well maintained and well designed vessels and support equipment for both onshore and offshore applications. We have an extensive assortment of NACE and ASME code vessels, allowing us to provide our customers with a fleet of equipment that is both trailer and skid mounted for rapid mobilization to any job site. Additionally, our equipment is

specifically designed to handle hazardous and lethal flow streams as well as high wellhead pressures and solids.

Only highly qualified personnel maintain and operate our equipment. To ensure reliability and customer satisfaction, we document the working history on all our equipment. Upon returning from each job, the equipment is cleaned, inspected, and repaired when necessary. A series of QA-QC procedures are also in place to ensure all equipment meets our high performance standards.

Performance At The Wellsite

With CETCO Oilfield Services, you can be sure that you will only get the best equipment, personnel, and service at a competitive price. Furthermore, our processes reduce project costs, minimize waste and associated disposal liabilities while producing a cleaner environment. So the next time you need an experienced well testing service provider, or a full service provider ranging from water treatment, pipeline, and well testing services to industrial wastewater, rentals and nitrogen services, you can be sure to count on CETCO Oilfield Services Company.
