

# 360K NITROGEN UNIT

## technical specifications

Equipment Weight		Dimensions & Flow Capacity	
Weight	31,000 lbs	96" x 180" x 102"	
		Capable of Pumping Liquid Nitrogen	
		Maximum Flow Rate	6,000 SCFM (360,000 SCFH)
		Minimum Flow Rate	800 SCFM (48,000 SCFH)

Nitrogen Specialty specializes in providing nitrogen applications for the oil, gas, pipeline, shipping, petrochemical and refinery industries.

Keeping up with the pace of technology is one of our top priorities. Our new High Rate Unit is rated 340 SCF at 10,000 PSI, and is capable of producing nitrogen gas at temperatures up to 200°F.

This means we can produce nitrogen gas at relatively high temperatures in hazardous areas without a direct-fired source of heat.

With more than 210 years of combined employee experience, and a full range of nitrogen applications offered, you just can't go wrong with Nitrogen Specialty.
